This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

Nomenclator entomologicus

ſecundum

Entomologiam ſyſtematicam

ill. Fabricii

adjectis ſpeciebus recens detectis et varietatibus

conſcriptus

a

Friderico Weber

Chilonienſi.

Chilonii et Hamburgi 1795.

Apud Carolum Erneſtum Bohn.

Lectori.

Suaſu ill. *Fabricii*, fautoris pie colendi, has paginas, et quidem eo conſilio, conſcripſi, ut, commoditati Entomologorum inſervirem, qui, quae poſſident in Muſeo inſecta, annotare cupient. Operam in primis dedi, ut opuſculi hujus volumen, tam arctis, quam fieri potuit, finibus coercerem, quo facilius ubique locorum transmitti poſſet, et amicis ſcientiae entomologicae deditis, neceſſaria quisque, indicare notumque facere poſſet. Pauca monere mihi licitum ſit. Opuſculum, penitus ſecundum Entomologiam ſyſtematicam *Fabricii*, elaboratum eſt. Quae ſaepius in ea occurrunt, una eademque nomina, conſentiente *Fabricio* noſtro, mutata ſunt; in parentheſi vero, nomen

hactenus retentum, futuro tempore rejiciendum, notatum eſt. Fruſtra quoque nonnullas in Nomenclatore ſpecies, quaeretis, quod ſecundum recentiores obſervationes, vel alii generi adjunctae, vel alius ſpeciei, varietates ſint. Quae quidem ſuo loco in Nomenclatore annotatae ſunt. Nonnunquam etiam ab aliis penitus non diverſae ſpecies deſunt, quod utique indicavi. Varietates praeterea, quantum fieri potuit, ut notarem, ſtudium mihi fuit. Quae ſi varietates, ab aliquo auctore, ſingulari nomine donatae erant, haec ſimul annotavi. *) Unico

---

*) Littera denotati auctores entomologici ſunt:

A. Appendix entom. *Fabricii.*

C. *Cramer.*

D. Agonatorum Claſſ. deſcr. *Daldorfii* inedita.

Deg. *Degeer.*

E. *Eſper.*

F. Entomologia ſyſtematica *Fabricii.*

H. *Herbſt.*

ſolum nomine, et quidem diagnoſtico, alias varietates denominare operam dedi, quibus plures ex mea collectione ſunt, hactenus in Entomologia ſyſtematica non recenſitae. Semper vero cum Muſeo Fabriciano collatae, et ab ipſo receptae ſunt. Facile enim, ut cum ſuis, mea compararem inſecta, ab hujus viri indulgentia impetravi. Quo factum eſt, ut collectio mea, haud parum hauſerit utilitatis, in primis, quod ad accuratam determinationem illius attinet.

Sic huic opuſculo variae inſunt obſervationes, quas Entomologiae cultoribus non plane ingratas fore, ſine jactantia ſperare poſſum.

L. *Linné*
M. Mantiſſa inſectorum *Fabricii.*
O. *Olivier.*
P. *Pallas.*
S. Supplementum inſectorum ineditum *Fabricii.*
W. Catalogus Vindobonenſis (Wiener Verzeichniſs.)

Facili quoque negotio, a *Fabricio* non receptas ſpecies, ex aliis ſcriptoribus, huic opuſculo inſerere potuiſſem, niſi metus mihi injectus eſſet, ne incuria quasdam aut praetermitterem, aut iniquo loco ponerem. Nimirum *Fabricius*, quas ipſe inſpexit ſpecies, ſolum recepit. Quae vero ab aliis auctoribus, in novarum numerum relatae ſunt, novo ſaepiſſime ſolum praeditae ſunt nomine. Nonnunquam etiam perdifficile eſt, ad quod genus Fabricianum, inſecta ſint referenda, conſtituere, niſi inſecta poſſideatis, quum raro deſcriptiones ſufficiant, ut ad genera Fabriciana rite referantur. A tirone minime ſaltem hic labor ſuſcipiendus erit. Attamen fortaſſe nonnulla mutaturus ero, ſi nova Nomenclatoris editio a me curaretur. Quod reliquum eſt, ita hoc opuſculum inſtruendum typisque exprimendum curavi, ut, quae *Fabriciano* ſyſtemati non inſunt ſpe-

cies, fàcili negotio ad marginem adnotari poſſint.

Entomologiae Fautoribus magna commutatio in Agonatorum claſſe occurret. Quae quidem ab obſervationibus annotationibusque, amiciſſimi *Daldorfii* originem et lucem duxit. Quae tam quoad habitum, quam oeconomiam, adeo inter ſe differunt animalia, ea in diſtincta genera ſunt diviſa. Brevi, magni momenti opus de Agonatis, oculatiſſimus *Daldorf* in lucem edet. Hactenus in hoc Nomenclatore, ea ita denominavi vel denotavi, ut ill. *Fabricius* in poſterum ea recipiet. Diſtinctiores vero horum generum characteres, in libro mox a *Daldorfio* edendo, proferentur. Complures vero, quas re vera continet Entomologia ſyſtematica, ſpecies, fruſtra in Nomenclatore, quaeretis eas ſcilicet, quaę dum haec typis mandarentur, in Muſeo Fabriciano non aderant. De his igitur,

certe conſtituere non potuit, ad quale genus, ſecundum novam diſtinctionem pertineant, nec tamen pro lubitu locum eis dare, fas duxit ill. *Fabricius.* Quasque tamen in praefationis fine, nomine Cancroideorum dubiorum, annotaſſe rectius mihi viſum eſt. Praeterea ut vel cum ill. *Fabricio*, vel mecum, eos communicare velint Entomologi, aut ſaltem accuratam deſcriptionem, ſecundum novam diſtinctionem generum, quae eximiis inſuper characteribus ſecundariis gaudent, impertire velint, enixe rogo. Novarum ſpecierum vim, in his Agonatis reperietis. Has et alias, quas *Fabricius*, poſt editionem entomologiae ſyſtematicae, denuo deſcripſit et aliquando, ſupplementi forma, in lucem proferet, ſuppeditare mihi, ei libuit, unde, nomenclator multis novis ſpeciebus augmentatus eſt.

Cel. Schneiderum de Entomologia bene meritum jam a. 1785 ſimilem ſuſcepiſſe laborem equidem non ignoro. Sed quum, et diverſa ſit, illius libri, ad ſyſtema Linneanum elaborati ratio, et copia in bibliopolarum tabernis non amplius ſuperſit, atque praeterea quoque ſpecierum numerus in immenſum, exinde auctus ſit; ſpero fore, ut opuſculum hoc, non plane ſuperfluum juſtis aeſtimatoribus habeatur.

Cancroidea dubia.
